# Wanderlust – a user manual

Log in - activity

To use the Wanderlust application the user must log in on his or hers account. If there are no account, the user can just register by pressing the button: "REGISTER".
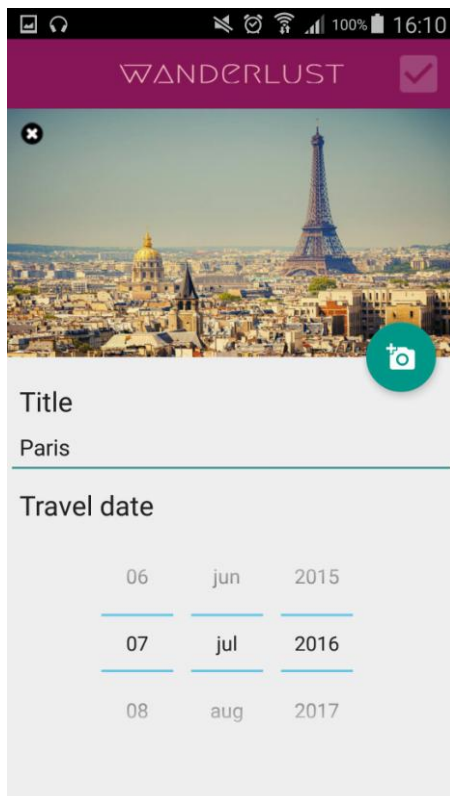

Start Page

Whilst the user is logged in, the first activity show all the coming travels that the user has added to his or hers account.

The user can decide to add a new travel by pressing the + button, or go to the user account by pressing the account button.
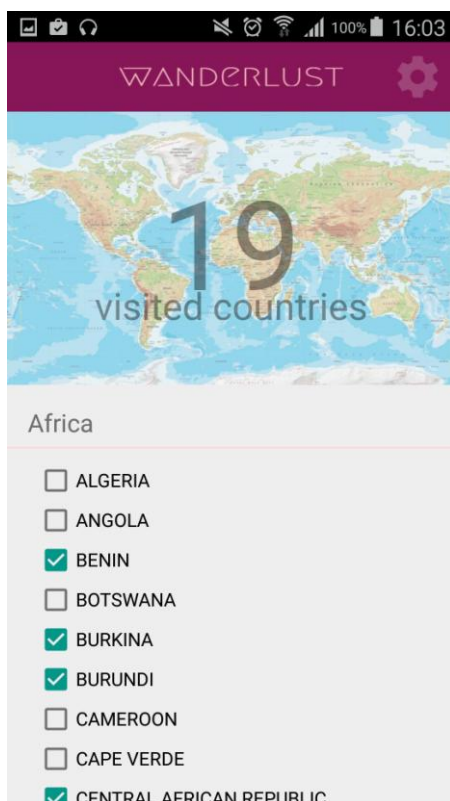

Activity for adding new travel

When adding a new travel the user can write a title for the travel, set the travel date and chose wallpaper. To chose a wallpaper is not obligatory and a default image is set if the user does not pick one herself or himself.

When the user is done he or she must press the done button for the information to be saved.
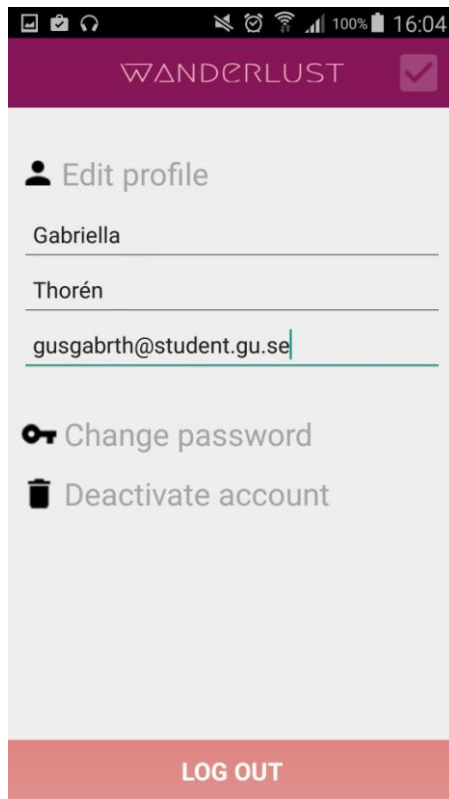

Account

In the activity for the user account, the user is able to select the countries he or she has visited and the application will calculate a total which is displayed for the user.

Edit user information

The user is able to change his' or hers' user information, deactivate his' or hers' account or just log out of the application for a while.
